Enrollment No.: _____

Darshan UNIVERSITY

Darshan Institute of Computer Application
BCA / B.Sc. (IT) | Sem-2 | Summer-2025

Course Code	:	2304CS201	**Date**	:	25-04-2025
Course Name	:	C Programming - II	**Duration**	:	150 Minutes
			Total Marks	:	70

Instructions:
1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

Q.1 **(A)** Explain function call with syntax. **4**

(B) Describe Actual argument with example. **3**

OR

Discuss function declaration with its syntax and example.

(C) Write a program to find factorial of a number using function. **7**

OR

Write a program to find power of any number using recursion.

Q.2 **(A)** Write short note on nested structure. **4**

(B) Describe structure with its syntax and example. **3**

OR

Compare structure and union.

(C) Write a program to Create a structure book with book title, author, publication, and price. Read data of 3 books and display. **7**

OR

Write a program to create structure student with name, percentage and age. Read data of 5 students using array of structure.

Q.3 **(A)** Write short note on Pointer to Structure with example. **4**

(B) Define malloc() function. **3**

OR

How to access a variable using a pointer? Write syntax and its example.

(C) Write a program to swap value of two numbers using pointer. **7**

OR

Write a program to store n elements in an array and print the elements using pointer.

Q.4	**(A)**	Explain Pre-defined macros in C.	**4**
	(B)	Explain macro with arguments with example.	**3**
		OR	
		Explain #if, #ifdef and #else directives with example.	
	(C)	Write a short note on File inclusion Directives with example.	**7**
		OR	
		Write short note on #pragma Directive with example.	
Q.5	**(A)**	Explain any two random access function with example.	**4**
	(B)	Explain fprintf() Function and fscanf() Function with example.	**3**
		OR	
		Explain fgetc() Function and fputc() Function with example.	
	(C)	Write a program in C to copy a file to another file.	**7**
		OR	
		Write a program in C to create and store numbers from 1 to 100 in a text file.
