Enrollment No.: _____

Darshan UNIVERSITY

Darshan Institute of Computer Application
BCA / B.Sc. (IT) | Sem-2 | Summer-2024

Course Code	:	2304CS201	**Date**	:	03-05-2024
Course Name	:	C Programming - II	**Duration**	:	150 Minutes
			Total Marks	:	70

Instructions:
1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

Q.1 **(A)** Explain function definition with syntax. **4**

(B) Describe recursion with example. **3**

OR

Discuss function call with its syntax and example.

(C) Explain all categories of functions. **7**

OR

Explain call by value and call by reference with example.

Q.2 **(A)** Write short note on array of structure. **4**

(B) Describe union with its syntax and example. **3**

OR

Compare structure and union.

(C) Write a program that create structure student with name, percentage and age. Read data of 5 students using array of structure and display all data. **7**

OR

Define a structure called Players which describe details like p_name, team, score, average. Write a program to read data for 2 players and print that data.

Q.3 **(A)** Write short note on initialization and declaration of a pointer. **4**

(B) Define free() function. **3**

OR

How to access a variable using a pointer? Write syntax and its example.

(C) Write a program to store n elements in an array and print the elements using pointer. **7**

OR

Write a program to calculate the sum of n numbers entered by the user using calloc().

Q.4	**(A)**	Explain Pre-processor Directives in C.	**4**
	(B)	Explain File inclusion Directives with example.	**3**
		OR	
		Explain Compiler Control Directives with example.	
	(C)	Write a short note on Macro Directives with example.	**7**
		OR	
		Write short note on #undef Directive and #pragma Directive.	
Q.5	**(A)**	Compare text files and binary files.	**4**
	(B)	Explain File pointer with example.	**3**
		OR	
		Explain putw() Function and getw() Function with example.	
	(C)	Write a program to count chars, spaces, tabs and new lines in a file.	**7**
		OR	
		Write a program to append one file at the end of other.
